UNITED STATES NATIONAL MUSEUM
WASHINGTON, D. C.

January 26, 1920.

Dr. B. L. Robinson,
Gray Herbarium,
Harvard University,
Cambridge, Massachusetts.

My dear Dr. Robinson:

Thank you very much for your letter of January 16 with your three lists of identifications of my Eupatoriums from Ecuador. I am glad to see that the collection contained so many novelties and interesting species.

With regard to those needing numbers I think that your temporary numbers can be combined, especially those about Huigra. Below I have given my new numbers and your equivalents,

Very truly,

Associate Curator,
Division of Plants.
